<b>Description</b>	
x86_64	
tor: : Started Anonymizing Overlay Network. /usr/bin/tor: error while loading shared libraries: libevent-2.1.so.7: cannot open shared object file: No such file or directory : tor.service: Main process exited, code=exited, status=127/n/a : tor.service: Failed with result 'exit-code'.	
libevent: Packages (1) libevent-2.1.10-1	
Total Download Size: 0.25 MiB Total Installed Size: 1.19 MiB Net Upgrade Size: 0.00 MiB	
:: Proceed with installation? [Y/n] :: Retrieving packages... error: failed retrieving file 'libevent-2.1.10-1-x86_64.pkg.tar.xz' from redirector.parabola.nu : The requested URL returned error: 404 error: failed retrieving file 'libevent-2.1.10-1-x86_64.pkg.tar.xz' from redirector.parabola.nu : The requested URL returned error: 404 error: failed retrieving file 'libevent-2.1.10-1-x86_64.pkg.tar.xz' from redirector.parabola.nu : The requested URL returned error: 404 error: failed retrieving file 'libevent-2.1.10-1-x86_64.pkg.tar.xz' from redirector.parabola.nu : The requested URL returned error: 404 error: failed retrieving file 'libevent-2.1.10-1-x86_64.pkg.tar.xz' from redirector.parabola.nu : The requested URL returned error: 404 warning: failed to retrieve some files error: failed to commit transaction (unexpected error) Errors occurred, no packages were upgraded.	
I'm understood that parabola is rolling release distro but last time everyone update was someone destroying.	

## History

### #1 - 2019-08-10 11:22 AM - freemor

This is most likely just a case of the mirrors not having sync'd the new package yet.  
Tor and libevent installed fine for me when I -Suy'd this morning.  
Please try again and let me know.

Now i successfully updated but anyway tor have same error and as i understand need create symlink.  
Symlink on libevent-2.1.so.6.0.4?

### #3 - 2019-08-10 11:57 AM - freemor

- Priority changed from bug to broken
- Assignee set to bill-auger
- Status changed from unconfirmed to confirmed
- Subject changed from [community/tor] [core/libevent] to [core/libevent] on Parabolas mirrors is out of sync with Arch, Breaks [community/tor]

Yep. looks like our mirrors are out of sync. Arch has libevent 2.1.11-1 we have 2.1.10-1

Assigning to bill-auger as he'll probably be around before Lukeshu

As a work around you can grab 2.1.11 from the archlinux.org website at:

[https://www.archlinux.org/packages/core/x86\\_64/libevent/download/](https://www.archlinux.org/packages/core/x86_64/libevent/download/)

and install it with:

```
sudo pacman -U libevent-2.1.11-1-x86_64.pkg.tar.xz
```

And then of course restarting Tor.

#### **#4 - 2019-08-10 01:02 PM - freemor**

- % Done changed from 0 to 80

- Status changed from confirmed to in progress

Now back in sync with some gentle nudging of the db-import services.

Will leave this open till bill-auger or Lukeshu take a look and make sure that there isn't something broken that would require such manual intervention all the time.

#### **#5 - 2019-08-10 10:11 PM - bill-auger**

- Status changed from in progress to not-a-bug

this was just normal expected behavior - the repos sync with arch once per day: core/extra at 00:00, and community at 04:00

the package 'core/libevent' was published at 2019-08-10 00:46 (30 minutes after the daily sync) - parabola would have gotten it tomorrow
