Description	
As everybody knows, Debian Iceweasel and Icedove are deprecated, but we continue its maintenance.	
<ul style="list-style-type: none">• https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=815006• https://glandium.org/blog/?p=3622• http://fossforce.com/2017/02/great-debian-iceweasel-icedove-saga/	
I thought it would be good to update their app icons as Mozilla did with Firefox Quantum and Thunderbird some time ago, and thought on these options:	
<ul style="list-style-type: none">• proposing this in the mailing list, and ask the community to create new designs• taking icons from, for example, Antu icon theme (here are the icons for iceweasel and icedove)	
The point of all of these is to give Iceweasel/Icedove a soft and modern icon design in harmony with their new UIs, even Tor Browser did this when it upgraded to Quantum
