| Description | |
| <p>As everybody knows, Debian Iceweasel and Icedove are deprecated, but we continue its maintenance.</p> <ul style="list-style-type: none">• https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=815006• https://glandium.org/blog/?p=3622• http://fossforce.com/2017/02/great-debian-iceweasel-icedove-saga/ <p>I thought it would be good to update their app icons as Mozilla did with Firefox Quantum and Thunderbird some time ago, and thought on these options:</p> <ul style="list-style-type: none">• proposing this in the mailing list, and ask the community to create new designs• taking icons from, for example, Antu icon theme (here are the icons for iceweasel and icedove) <p>The point of all of these is to give Iceweasel/Icedove a soft and modern icon design in harmony with their new UIs, even Tor Browser did this when it upgraded to Quantum</p> | |
