Packages - Packaging Request #2513

[libretools] needs rebuild for pacman 5.2

2019-10-25 04:13 AM - infertux

Status:	fixed	% Done:	100%
Priority:	broken		
Assignee:	ovruni		
Category:			

Description

```
$ sudo pacman -Syu
[...]
installing pacman (5.2.0-2.parabola1) breaks dependency 'pacman<5.2' required by libretools
```

ovruni -

i added some features to libretools recently; but i did not rebuild because i wasnt quite sure how to build and publish it - it looks like one of those intermediate soutcr-ball deals like is often handled but those mksource() functions - i have another patch actually; but its not well tested - ive been waiting to ask lukeshu about the workflow; and to check that none of my patches broken anything

if you know how this is done could you explain the workflow

- % Done changed from 0 to 90

- Status changed from open to in progress

#5 - 2019-10-26 06:56 PM - ovruni

I have pushed libretools-20181004-6.1 in the libre-testing repo. Please let me know if everything is OK.

#6 - 2019-10-27 04:34 AM - infertux

Thank you @ovruni. Everything looks good to me and I was able to update pacman and yay. Yay! I'll let you close this ticket once the new package lands in the libre repo.
