

Packages - Bug #254

[tokyocabinet] is a dep of [libretools] ([libre]), but is in [social]

2012-11-29 06:13 PM - lukeshu

Status: fixed	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description It needs to be moved to [libre]. The DB scripts are buggy, and I've messed things up before when trying such moves.	

History

#4 - 2012-12-02 11:14 PM - Anonymous

db-move command doesn't work correctly, so I removed tokyocabinet from social repo, and added a new revision for the package. I built for i686 and x86_64, but is necessary build for mips64el version to close this report. I don't have a mips64el machine to build it.

#5 - 2012-12-03 09:06 AM - mtjm

Doesn't look necessary, we already have an older pkgrel of it.

Please include 'mips64el' in the arch= array when requesting a build of your package, there is no need to add it separately.

Report a separate issue for db-move?
