

## Packages - Bug #2555

### [libre/icedove-extension-enigmail] Not compatible with icedove v68

2019-11-23 12:01 PM - infertux

<b>Status:</b> fixed	<b>% Done:</b> 0%
<b>Priority:</b> broken	
<b>Assignee:</b> bill-auger	
<b>Category:</b>	
<b>Description</b>	
The icedove-extension-enigmail package (currently version 2.0.9-1) is not compatible with the newly updated Icedove 68. It does not show up in the Add-ons list. I guess it needs a rebuild for Icedove 68.	

#### History

##### #1 - 2019-11-23 05:04 PM - bill-auger

- Priority changed from bug to broken
- Status changed from open to confirmed
- Tracker changed from Packaging Request to Bug

looking into this, i noticed that we have an orphan package in [pcr]

```
$ pacman -Ss enigmail
libre/icedove-extension-enigmail 2.0.9-1
    OpenPGP message encryption and authentication for Icedove
pcr/icedove-enigmail 1.9.9-1
    Icedove extension that enables sending and receiving signed and encrypted email messages
```

##### #2 - 2019-11-23 07:43 PM - bill-auger

- Assignee set to bill-auger
- Status changed from confirmed to not-a-bug

ive upgraded libre/icedove-extension-enigmail to v2.1.3; and deleted the older ones from [pcr]

Good job [bill-auger](#), thank you!

##### #4 - 2019-11-24 06:04 PM - bill-auger

- Status changed from not-a-bug to fixed

##### #5 - 2020-07-05 05:39 AM - bill-auger

- Subject changed from [libre/icedove-extension-enigmail] Not compatible with [icedove] to [libre/icedove-extension-enigmail] Not compatible with icedove v68

just a note for future reference: the enigmail add-on declares its dependency on the application version in a manifest file - rather than pinning it to the current icedove package, the package needs only to be pinned to the current major version of icedove
