Packages - Bug #2559

Packaging Request # 2506 (in progress): arch introduced a base metapackage to replace the meta group

Housekeeping # 2549 (in progress): move non-systemd packages to [nonsystemd]

conflict installing openrc-desktop - /mnt/etc/init.d/NetworkManager exists in both 'networkmanager' and 'networkmanager-openrc'

Description

```
checking for file conflicts...
/mnt/etc/NetworkManager/dispatcher.d/10-openrc-status exists in both 'networkmanager' and 'network
manager-openrc'
/mnt/etc/conf.d/NetworkManager exists in both 'networkmanager' and 'networkmanager-openrc'
/mnt/etc/init.d/NetworkManager exists in both 'networkmanager' and 'networkmanager-openrc'
Errors occurred, no packages were upgraded.
```

- Parent task set to #2549

#2 - 2019-12-13 01:45 AM - bill-auger

this is because 'pcr/networkmanager-openrc' is in the 'openrc-desktop' - for now, i changed the wiki instructions from:

```
# pacstrap /mnt openrc-desktop systemd-dummy
```

to:

```
 # pacstrap /mnt acpid-openrc alsa-utils-openrc avahi-openrc bluez-openrc displaymanager-openrc \
    elogind gpm-openrc modemmanager-pk-rules opensysusers wpa_supplicant-openrc
```

probably many of those packages will be renamed or replaced soon; but that command gets the system installed for now

'opensysusers' needs to be included here because dbus will not start without it - if dbus can not start, then elogind and networkmanager will not start either

i then added the install of 'nonsystem/networkmanager' as a separate step, assuming that it is not stirctly necessary if one wants to use some other networking config tool
