I have tried

pacman-key --refresh-keys

- Status changed from unconfirmed to confirmed

Not Fake, just stale. Luke R. has not been around in forever.. If you look at the related issue you'll see that a lot of packages were effected. Also searching in bug tracker first would have answered this for you when you read [#2405](#).

Did a quick and dirty rebuild to move them to my key.
Do not have time or energy for testing right now. But at least people can install them.
