<b>Description</b>	
It looks like [tor-hardened-preferences] is using port 9150 and conflicts with Tor Browser.	

#### History

##### #1 - 2020-02-09 08:23 PM - freemor

- Priority changed from bug to wish

- Status changed from unconfirmed to not-a-bug

Tor Browser is not a package in the repos

Thus is unsupported

marking not-a-bug

##### #2 - 2020-02-09 08:35 PM - freemor

Easiest fix would be to use the tor package from the repos hnad have TBB use that instead of the tor it includes.

IIRC TBB will see you already have a tor running and ask if you want to use that..  
and then propmtly use the control port 9051 to change all the settings possibly undoing  
or rei-doing the "hardened" settings

Or configure tbb to use a different control port.

Also as tor-hardened-preferences is for the tor in the repo it most likely would not effect the settings  
in TBB as it stors it's tor config in a completely different place.
