Description			
<p>Hi, I have tested in several system the installation of Parabola Desktop Edition OpenRC LXDE flavor, and in all I have problems. Once the installation has finished the system doesn't boot. I have tested in:</p> <ul style="list-style-type: none">• X200 Libreboot system• normal BIOS system• QEMU/KVM system <p>The install scripts apparently it runs normally and it's doesn't show any error. I send a screen capture of grub install phase and the system boot process.</p>

I plan to replace those install scripts with a fork of Revenge Installer, a zenity script, so it's graphical. Plus, I do not recommend or use the install scripts, they're old and prone to things like this. For now, you'll have to install it The Arch Way
