

## Packages - Bug #2636

### [openrc-desktop]: unable to start - typo in init scripts

2020-02-17 06:18 PM - nona

<b>Status:</b> fixed	<b>% Done:</b> 0%
<b>Priority:</b> bug	
<b>Assignee:</b> Megver83	
<b>Category:</b>	
<b>Description</b>	
Hi, this may be related: - <a href="https://labs.parabola.nu/issues/2520">https://labs.parabola.nu/issues/2520</a> - <a href="https://labs.parabola.nu/issues/2635">https://labs.parabola.nu/issues/2635</a>	
With this	
<pre>rc-service acpid start</pre>	
I got this	
<pre>* Caching service dependencies ... [ ok ] * Starting acpid ... * start-stop-daemon: /usr/usr/bin/acpid does not exist * Failed to start acpid  [ !! ] * ERROR: acpid failed to start</pre>	
Changing /etc/init.d/acpid from	
<pre>... command="/usr/usr/bin/acpid" ...</pre>	
to	
<pre>... command="/usr/bin/acpid" ...</pre>	
fixed the issue	

### History

#1 - 2020-02-17 07:13 PM - nona

```
pacman -Qs acpid
```

```
local/acpid 2.0.32-1
  A daemon for delivering ACPI power management events with netlink support
local/acpid-openrc 20200112-1 (openrc-desktop)
  OpenRC acpid init script
```

```
uname -r
```

```
4.19.101-gnu-1-lts
```

## #2 - 2020-03-14 07:48 PM - BetaRays

I have noticed the same problem with the provided wpa\_supplicant initscript after updating.

## #3 - 2020-03-15 01:57 AM - bill-auger

- Assignee set to Megver83

- Subject changed from *acpid unable to start* to *[acpid-openrc][wpa\_supplicant-openrc]: unable to start - typos in init scripts*

these are in different packages; but the typo is the same - so maybe this affects other init scripts too? - we should probably check to see if there are any others

nona - do you have 'wpa\_supplicant-openrc' installed? - does that start properly for you?

## #4 - 2020-03-15 04:08 AM - nona

```
# rc-service wpa_supplicant restart
* Could not find a wireless interface
* ERROR: wpa_supplicant failed to start
```

I do not actually have a wireless interface. I think that asking me is useless, but I do see that the same problem exists in the init script (namely /usr/usr/ should only be /usr).

There is a typo in the title of this bug: typos should be typo.

## #5 - 2020-08-17 12:05 AM - zackattackz

I had the same issue with having to replace /usr/usr... with /usr

Was it a problem on my end or should the repo have been updated by now? It's been 6 months

## #6 - 2020-08-17 01:18 AM - nona

- Subject changed from *[acpid-openrc][wpa\_supplicant-openrc]: unable to start - typos in init scripts* to *[acpid-openrc][wpa\_supplicant-openrc]: unable to start - typo in init scripts*

## #7 - 2020-08-17 03:04 AM - bill-auger

- Status changed from *unconfirmed* to *confirmed*

- Subject changed from *[acpid-openrc][wpa\_supplicant-openrc]: unable to start - typo in init scripts* to *[acpid-openrc][wpa\_supplicant-openrc][gpm-openrc]: unable to start - typo in init scripts*

also 'nonsystemd/gpm-openrc' - possibly others - these are the ones i have installed:

```
$ grep '/usr/usr/' /etc/init.d/*
/etc/init.d/acpid:command="/usr/usr/bin/acpid"
/etc/init.d/gpm:command=/usr/usr/bin/gpm
/etc/init.d/wpa_supplicant:command=/usr/usr/bin/wpa_supplicant
```

## #8 - 2020-08-17 05:00 PM - Megver83

- Status changed from *confirmed* to *fixed*

- Subject changed from *[acpid-openrc][wpa\_supplicant-openrc][gpm-openrc]: unable to start - typo in init scripts* to *[openrc-desktop]: unable to start - typo in init scripts*

this happened because of a wrong sed expression, which I just fixed:
