| Description | | | |
| when running the 'repro' command from archlinux-repro, an Arch Linux bootstrap image is downloaded, which means we should evaluate if this is a freedom issue as Arch Linux is non-free (similar issue with debootstrap) | | | |

History

#1 - 2020-03-03 03:33 PM - GNUtoo

debootstrap should be fine as we only ship the scripts to install FSDG compliant distributions.
