

Packages - Bug #2659

lib32-dbus and dbus are conflicting (nonsystemd)

2020-03-22 06:11 PM - Time4Tea

Status: fixed	% Done: 0%
Priority: bug

Description	
Hi, I just tried to install lib32-libdbus (x86) and got the following error:	
<pre>looking for conflicting packages... :: lib32-dbus and dbus are in conflict (libdbus-1.so). Remove dbus? [y/N] error: unresolvable package conflicts detected error: failed to prepare transaction (conflicting dependencies) :: lib32-dbus and dbus are in conflict</pre>	
Something must be wrong here, as dbus is listed as a dependency of lib32-dbus. I have the nonsystemd version of dbus installed.

Sorry, I meant lib32-dbus. Doesn't look like I can edit the original post.

It's likely you do not have [nonsystemd-multilib] enabled or above [multilib] in pacman.conf, which avoids you from installing nonsystemd-multilib/lib32-dbus instead of multilib/lib32-dbus

[Megver83](#) yes, that worked. Thanks!

Hi, FYI: this seems to be happening again. I am seeing the same problem with lib32-dbus conflicting with dbus, even though I have [nonsystemd-multilib] above [multilib] in my pacman.conf. Possibly because the lib32-dbus package in [nonsystemd-multilib] is behind the version in [multilib], so it is trying to install the [multilib] one?
