

Packages - Bug #2664

[gimp] GIMP (i686) requires BABL version 0.1.74 or later

2020-04-01 10:07 PM - leomd

Status: not-a-bug	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description GIMP Message BABL version too old! GIMP requires BABL version 0.1.74 or later. Installed BABL version is 0.1.72. Somehow you or your software packager managed to install GIMP with an older BABL version. Please upgrade to BABL version 0.1.74 or later.	

History

#1 - 2020-04-02 12:40 AM - freemor

babl is in extra so not maintained by us. It is probably in the build queue and just hasn't been built/pushed yet.

If the issue doesn't resolve in a while (day or two) give this a bump and one of the devs here will push the issue upstream to their bugtracker.
