Description			
Hello,			
I updated vtk, and I am getting			
<pre>Python 3.8.2 (default, Apr 8 2020, 14:31:25) [GCC 9.3.0] on linux Type "help", "copyright", "credits" or "license" for more information. >>> import vtk Traceback (most recent call last): File "/usr/lib/python3.8/site-packages/vtkmodules/vtkIOFFMPEG.py", line 5, in <module> from .vtkIOFFMPEGPython import * ImportError: libffi.so.6: cannot open shared object file: No such file or directory During handling of the above exception, another exception occurred: Traceback (most recent call last): File "<stdin>", line 1, in <module> File "/usr/lib/python3.8/site-packages/vtk.py", line 32, in <module> all_spec.loader.exec_module(all_m) File "/usr/lib/python3.8/site-packages/vtkmodules/all.py", line 107, in <module> from .vtkIOFFMPEG import * File "/usr/lib/python3.8/site-packages/vtkmodules/vtkIOFFMPEG.py", line 9, in <module> from vtkIOFFMPEGPython import * ModuleNotFoundError: No module named 'vtkIOFFMPEGPython'</pre>			
<pre>pacman -Q vtk vtk 8.2.0-10 uname -r 5.4.28-gnu-1-lts x86_64</pre>

- Status changed from unconfirmed to info needed

I can not reproduce this. are you on an openrc system? in that case, this is probably a duplicate of [#2694](#)

#3 - 2020-04-16 03:09 AM - nona

Hi! Oh, yeah, OpenRC, and yes, rebuilding p11-kit on my system solves the issue with VTK.
