<b>Description</b> My computer so much time can't start X with 1:19.1.0-1 but work correctly with old driver 1:19.0.1-1	
<b>Related issues:</b> Related to Packages - Bug #2511: [xf86-video-ati]: X can't start <b>confirmed</b> Related to Packages - Bug #2517: xf86-video-ati breaks xorg <b>duplicate</b>	

### History

#### #1 - 2020-04-16 12:56 PM - pisechka

Card radeon hd 6310

#### #2 - 2020-05-17 05:45 PM - sobek

I have the same issue with an AMD Radeon HD 5450 (on a kgpe-d16 from vikings.net):

```
$ lspci -nn
```

...

```
01:00.0 VGA compatible controller [0300]: Advanced Micro Devices, Inc. [AMD/ATI] Cedar [Radeon HD 5000/6000/7350/8350 Series] [1002:68f9]
```

...

With "xf86-video-ati-1:19.0.1-1" X starts without problem.

With "xf86-video-ati-1:19.0.1-1" and "xf86-video-ati-1:19.0.1-2" X does not start. I see only a solid cursor in the upper left corner. I cannot switch to a TTY with Ctrl+Shift+Fx. I must use a different computer and fix the problem by downgrading the package with:

```
$ cd /var/cache/pacman/pkg && sudo pacman -U xf86-video-ati-1\19.0.1-1-x86_64.pkg.tar.xz
```

...

```
warning: downgrading package xf86-video-ati (1:19.1.0-1 => 1:19.0.1-1)
```

...

Kernel version does not matter from my point of view. The "xf86-video-ati-1:19.0.1-1" version works with these kernels:

```
$ uname -a
```

```
Linux kgpe-d16 5.5.7-gnu-1 #1 SMP PREEMPT Mon, 02 Mar 2020 22:54:55 +0000 x86_64 GNU/Linux
```

```
$ uname -a
```

```
Linux kgpe-d16 5.6.12-gnu-1 #1 SMP PREEMPT Mon, 11 May 2020 15:07:26 +0000 x86_64 GNU/Linux
```

To me it seems this ticket is a duplicate of Bug [#2517](#)

#### #4 - 2020-05-23 12:57 PM - bill-auger

possibly related to [#2511](#)

possibly related to [#2517](#)

#### #5 - 2020-05-23 12:58 PM - bill-auger

- Related to Bug #2511: [xf86-video-ati]: X can't start added

#### #6 - 2020-05-23 12:59 PM - bill-auger

- Related to Bug #2517: xf86-video-ati breaks xorg added

#### #7 - 2020-05-23 05:00 PM - bill-auger

- Status changed from unconfirmed to duplicate

Issue [#2511](#) has been updated by Megver83.

If downgrading xf86-video-ati solves the issue, then it is not a firmware problem.

Issue [#2511](#) shows the real problem with X, please, follow up that thread.
