'pygtk' was dropped from arch and archarm - i am adding it to [pcr] now - i dont think 'usbutils' is a problem though

Hello. I have trouble with "pygtk" module. I did not open a new bug report, because apparently this is a continuation of the current one.

```
$ sudo pacman -S h-client --assume-installed python2-pycurl,libglade,python2-cairo,python2-gobject2
$ h-client
