Packages - Bug #271

[cdrkit-libre] replaces [cdrtools] while both packages are available

2012-12-03 01:59 PM - mtjm

Status:	fixed	**% Done:**	0%
Priority:	freedom issue		
Assignee:			
Category:			

Description
Check if the reasons to blacklist cdrkit or the reasons for Debian to fork it apply to current cdrtools and maybe blacklist it.   Reported by drtan on #parabola.

History

#3 - 2012-12-03 09:25 PM - Anonymous

It is included on blacklist due that has a apple's license binding with no clarification. I don't know if the last version fixed it.

#4 - 2013-02-23 01:26 PM - mtjm

cdrtools-3.01 has the same Apple license issue that cdrkit-libre solves. It also has a GPL-licensed mkisofs linking to a CDDL-licensed library. We should blacklist it.

#5 - 2013-02-23 04:03 PM - Anonymous

ok, i will do it

#6 - 2013-02-23 08:11 PM - Anonymous

I made changes on cdrkit removing 'cdrtools' on replace, provides and conflicts line due that it has reverse conflict from cdrtools. Meanwhile, i put cdrtools on blacklist and it was replaced by cdrtools-libre [0]

See e.g. https://fedoraproject.org/wiki/Forbidden_items#cdrtools for why other distros do not include it. Is there a reason to keep it here?

#8 - 2013-02-24 05:24 AM - Anonymous

ah ok mtjm, so due that cdrtools has an incompatible mix of the GPL and the CDDL, it will be removed from our distro. thanks for the information.

#9 - 2013-02-25 07:27 AM - Anonymous

cdrtools was included on blacklist, cdrtools-libre was removed due that source code has a mix of incompatibility licenses, so it don't can be resolved. cdrkit-libre is the free alternative of cdrkit and cdrtools on Parabola (cdrtools was included on conflict, provides and replace line of cdrkit-libre again). Solved!
