

Packages - Packaging Request #2772

[hardinfo] Conflicts with ICU 67 (x86_64)

2020-05-10 01:31 AM - eliotime3000

Status: duplicate	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description Actually, I discovered that ICU dependence affects to Hardinfo, which makes almost impossible to upgrade in x86_64. Also, it may affect to armv7h.

- Status changed from open to duplicate

- Tracker changed from Housekeeping to Packaging Request

it does - the new icu-parabola package is intended to remove these conflicts - there is an open ticket now for 'hardinfo' [#2057](#) and every other dependent of icu - in the future, bug reports related to icu conflicts should never happen; and we intend to re-use those same tickets indefinitely instead of opening new tickets every new icu release

the 'icu-parabola' package allows upgrading the system during the transition from one icu release to the next - the current way to do that is:

```
# pacman -Sy icu-parabola
# pacman -Su --assume-installed=icu=65
```
