

Packages - Bug #2774

KDE apps don't function after updating

2020-05-11 01:24 PM - infinite_recursion

Status: fixed	% Done: 0%
Priority: bug	
Assignee: oaken-source	
Category:	
Description Today 11th May 2020, I updated my system with pacman -Syu and now my kde apps do not work. Can't open konsole Can't open kate Can't open dolphin LibreOffice writer and iceweasel work On pressing the Start Icon, it gives the following error msg: Error loading QML file: file:///usr/share/plasma/plasmoids/org.kde.plasma.kickoff/contents/ui/Kickoff.qml:31:1: plugin cannot be loaded for module "org.kde.plasma.private.kicker": Cannot load library /usr/lib/qt/qml/org/kde/plasma/private/kicker/libkickerplugin.so: (/usr/lib/libKF5Parts.so.5: undefined symbol: _ZN3KIO18CommandLauncherJob13setExecutableERK7QString)
