[texlive-bin] mktexlsr not included

2020-06-06 05:02 PM - divad42

Status: duplicate	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description mktexlsr is not included in texlive-bin, which renders things like pdflatex useless	

History

this was just discussed about a month ago (see [#2769](#)) - the missing mktexlsr does not seem to be a problem - if the ``pdflatex`` command does not work, probably you do not have the 'texlive-latexextra' package installed

if you have any trouble after installing 'texlive-latexextra', add a comment to [#2769](#) - maybe the issue needs to be re-opened
