

Packages - Bug #2793

[core] repo is out of sync with upstream

2020-06-07 07:35 AM - grizzlyuser

Status: fixed	% Done: 0%
Priority: bug	
Assignee: bill-auger	
Category:	
Description https://www.parabola.nu/packages/?repo=Core&sort=-last_update&arch=x86_64 https://www.archlinux.org/packages/?repo=Core&sort=-last_update As can be seen from the above links, it looks like [core] repo in Parabola stopped syncing around 2020-06-01. Although the most recently synced package was libgpg-error, there are older updates that haven't been synced, like nss and ca-certificates-mozilla. For i686 and armv7h the sync stopped also, as can be seen from the versions of those two example packages in Parabola, which are lower than in upstream.	

History

+1 :)

maybe devs are busy with core repo because of the last linux kernel problems... https://www.archlinux.org/packages/core/x86_64/linux/ (i don't know)

#2 - 2020-06-07 07:51 PM - bill-auger

- Status changed from unconfirmed to in progress

thanks for noticing - the same was true for all repos, from arch32 and archarm also - this happens from time to time - it is usually easy to get the packages flowing again, once someone notices; and it happens so rarely, that i have not bothered to find out why - everything should be in sync within an hour or two
