<b>Description</b> It's not possible to use pandoc, because it can't find the file `libHStagsoup-0.14.8-8wL7k6OInD6FMRsPKyYQRU-ghc8.10.1.so` I guess it needs to be rebuild with the new version of haskell-tagsoup since the file now provided is `libHStagsoup-0.14.8-8IRikhRMkUXHLNPwl9W32R-ghc8.10.1.so`  \$ pandoc master_thesis_julian_sparber.tex -o mybook.epub --webtex pandoc: error while loading shared libraries: libHSzip-archive-0.4.1-BgvYJnalqzcLyWBqmlQoEo-ghc8.10.1.so: cannot open shared object file: No such file or directory`

Pandoc installs fine, but when running

```
pandoc master_thesis_julian_sparber.tex -o mybook.epub --webtex  
  
pandoc: error while  
loading shared libraries: libHSzip-archive-0.4.1-BgvYJnalqzcLyWBqmlQoEo-ghc8.10.1.so: cannot open shared objec  
t file: No such file or directory
```

It can't find a library. I tried to create symlinks but there are to many missing libs and therefore I stopped.
