Description
Hello Parabola Hackers,   a friend of mine has corebooted a Thinkpad x230 for me and installed Parabola OpenRC LXDE.   Now i have the problem that my trackpad & and trackpoint is not working.   As a newbie i searched the Parabola wiki and tried to configure the file   /etc/X11/xorg.conf.d/70-synaptics.conf   but i had no success.   Can you please give me an idea, what i can try to solve the problem.   Thanks in advance!   Vane
