

Packages - Packaging Request #2855

Corebot utils - cbmem

2020-08-05 10:18 AM - CBotulinum

Status: Priority: Assignee: Category:	open bug	% Done: 0%
Description I see that upstream packages cbmem-git from Coreboot: https://aur.archlinux.org/packages/cbmem-git/ It is GPLv2. It is a useful piece of software for those running systems that utilize Coreboot or (its downstream distro) Libreboot.
