

## Packages - Bug #2905

Freedom Issue # 972 (forwarded upstream): TeXLive freedom verification

### dollar sign \\$ doesn't work in parabola texlive

2020-10-09 09:40 AM - joinlaw

<b>Status:</b> fixed	<b>% Done:</b> 0%
<b>Priority:</b> bug	
<b>Assignee:</b> oaken-source	
<b>Category:</b>	
<b>Description</b> The current parabola texlive installation doesn't show dollar sign symbol \\$ because of missing font or non-free font.  Here error message:  ./tt.tex:33: Font TS1/cmr/m/n/10.95=tcrm1095 at 10.95pt not loadable: Metric (TFM) file not found. <to be read again> relax l.33 ...et tortor. Nam euismod tellus id erat. \\$ \\$ \\$ \\$ \\$ \\$ \\$ \\$ \\$	
Workaround:  Compile file with lualatex or xelatex

## History

### #1 - 2020-10-16 09:55 PM - bill-auger

that looks like it is requiring a very specific font, at a very specific size - have you tried changing it to some other font?

also, you could try installing all of the texlive packages

\$ pacman -Sg texlive-most

### #2 - 2020-12-05 08:33 AM - oaken-source

- Has duplicate Bug #2937: texlive can't find some fonts during installation added

### #3 - 2020-12-05 08:36 AM - oaken-source

- Assignee set to oaken-source

- Status changed from unconfirmed to confirmed

this is caused by missing ecfonts in our distribution of texlive, that are being substituted for the Computer Modern Roman (cmr) font set as default by pdflatex.

ecfonts is being added back to the distribution in the next update, since it has changed its license to become free software as recognized by the FSF.
