<b>Description</b>	
Hi,	
Mplayer (or SMPlayer) crash when I'm using the vaapi output.	
<pre>mplayer -vo vaapi -va vaapi movie.avi</pre>	
I have a Intel Core i3-3225 cpu (graphics HD4000). I am using the xf86-video-intel driver.	
<pre>[shefla@pc-salon ~]\$ pacman -Q linux-libre xf86-video-intel mplayer-vaapi-libre intel-dri libva-intel-driver linux-libre 3.7.2-1 xf86-video-intel 2.20.17-1 mplayer-vaapi-libre 35107-3.1 intel-dri 9.0.1-1 libva-intel-driver 1.0.19-1</pre>	
The problem occurs when closing the application during playing or when the movie ends. Sometime X freeze (hard reboot needed), sometime X crash and reboot (due to my systemd autologin config).	
Any idea ?	
Thanks and regards	

### History

#### #2 - 2013-01-18 06:49 AM - Anonymous

mplayer-vaapi-libre was released recently, I think that it was resolved by coadde, but is better that you check it to confirm before close this bug

#### #3 - 2013-01-21 04:57 PM - loic.vaumerel

Hi,

It is now working.  
I just upgrade the system.

```
pacman -Q linux-libre xf86-video-intel mplayer-vaapi-libre intel-dri libva-intel-driver  
linux-libre 3.7.3-1  
xf86-video-intel 2.20.18-1  
mplayer-vaapi-libre 35107-4  
intel-dri 9.0.1-1  
libva-intel-driver 1.0.19-1
```

Thanks for your help
