

Packages - Bug #2927

your-initfreedom and systemd-nss-myhostname are in conflict

2020-11-11 02:34 PM - infinite_recursion

Status:	not-a-bug	% Done:	0%
Priority:	bug		
Assignee:			
Category:			
Description			
<pre>pacstrap -C /usr/share/pacman/defaults/pacman.conf.armv7h -i /mnt/ base ... :: your-initfreedom and systemd-nss-myhostname are in conflict</pre> <p>There are 2 base packages for armv7h, 1 in libre and 1 in nonsystemd. I wanted to install the 1 in nonsystemd to install openrc. There's no prompt or way to proceed and the above error throws up.</p> <p>I had to workaround by installing all the packages of base group in openrc by listing them all.</p>

My bad. Please close this issue.

#3 - 2020-11-13 06:03 AM - bill-auger

- Status changed from unconfirmed to not-a-bug
- Subject changed from base package conflicts for installing openrc parabola on armv7h to your-initfreedom and systemd-nss-myhostname are in conflict
