

Packages - Bug #2953

host command cannot find MX records on parabola (bind)

2020-12-26 02:02 PM - infinite_recursion

Status: not-a-bug	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description	
On parabola after installing bind:	
<pre>\$ host -tmx tutanota.com \$;; connection timed out; no servers could be reached</pre>	
On ubuntu after installing bind9:	
<pre>\$ host -tmx tutanota.com \$ tutanota.com mail is handled by 0 mail.tutanota.de</pre>	
I'm setting up a send-only mail server (opensmtpd) on lime2. I cannot send mails because MX records are not found.	

History

#1 - 2020-12-26 02:09 PM - bill-auger

according to the manual, the -t option accepts an argument, and -m option appears to require an argument, and there is no -x option

nonetheless i ran the command, and it gives the response that you expected

```
$ host -tmx tutanota.com
tutanota.com mail is handled by 0 mail.tutanota.de.
```

i should also add that "on parabola" is almost meaningless; because there is no single parabola system - it is very important to specify the arch and init-system - any number of problems could exist with one arch/init combination, but not necessarily repeatable on others

#2 - 2020-12-26 02:17 PM - infinite_recursion

Do close this issue. I guess there's a problem on my system, both armv7 and x86_64. Maybe there's a problem with my ISPs.

#3 - 2020-12-26 02:23 PM - bill-auger

- Status changed from unconfirmed to not-a-bug

maybe your router or firewall is blocking the request
