

Packages - Freedom Issue #2965

Freedom Issue # 1167 (confirmed): [chromium][electron][qt5-webengine][qt6-webengine] QTWebgine/Electron embeds "entire Chromium platform"

[digikam]: depends on qt5-webengine

2021-01-20 09:02 AM - bill-auger

Status: confirmed	% Done: 0%
Priority: freedom issue	
Assignee:	
Category:	
Description	
another one bites the dust	
<pre>\$ digikam digikam: error while loading shared libraries: libQt5WebEngineWidgets.so.5: cannot open shared object file: No such file or directory \$ lddtree `which digikam` grep None libQt5WebEngineWidgets.so.5 => None libQt5WebEngineCore.so.5 => None</pre>	
more precisely: "links to" - webengine is not in its dependency chain; because the dependency is satisfied in arch indirectly via 'marble-common' (which is rebuilt in [libre] to remove webengine support)

Any progress on this? Will digiKam be removed or fixed?
