Description

For the past number of weeks, I've been seeing messages of this form irrespective of the package being updated.

error: failed retrieving <package> from redirector.parabola.nu : Resolving timed out after 10000 milliseconds

and on occasion the following:

error: failed retrieving <package> from redirector.parabola.nu : Maximum (10) redirects followed

The packages in question still get updated (but just take a little longer) so not sure if this is a bug with this server or not but reporting it nonetheless. Thanks for your time.

History

that usually means that one of the servers was not responding at the time - its usually nothing to worry about - thats why the default mirrorlist has the redirector multiple times, so that it will try another server

#2 - 2021-03-18 09:06 AM - doolio

Thanks Bill. I thought that may be the case but wanted to bring it to people's attention as it has only started to happen very recently. Feel free to close this issue.

#3 - 2022-05-07 06:06 AM - Zuss

Requesting to mark this issue as fixed as it only seemed to be an issue at the time.

#4 - 2022-05-14 11:17 AM - Zuss

- Status changed from unconfirmed to not-a-bug

#5 - 2022-06-10 01:42 PM - doolio

Sorry for my late reply. Happy for this issue to be closed.
