History

#1 - 2021-03-20 03:30 PM - blacklung

- File *url.txt* added

I was not able to submit the real URL due to forum account limitations, so I've attached it to this text file. It is concerning that the Traefik UI is loading Google Analytics, among its own trackers, which was not disclosed at all until a user discovered it.

#2 - 2021-03-20 05:18 PM - freemor

"Written in Go..." Well, theres your problem. Go Developers love to pull in any library they need from github.

This package is such an offender. Ti therefore can not be built with LibreTools (Tries to pull extra sources wheile building)

Since there are many reverse proxy solutions I'd vote to just blacklist this one.

/me goes to see what all it pulls in during a build

#3 - 2021-03-20 06:26 PM - freemor

- File *Pulls.txt* added

Yep this is a major offender. See attached Pulls.txt

I definitely vote blacklist now.

#4 - 2021-03-20 06:50 PM - bill-auger

no objections from me - its a shame that arch allows this

#5 - 2021-03-23 08:11 PM - bill-auger

- Assignee set to *bill-auger*

done

#6 - 2021-03-23 08:11 PM - bill-auger

- Status changed from *unconfirmed* to *fixed*
