Description

Hello! I just installed Openshot 2.5.1-1 and it throws this Python related traceback when I run openshot-qt:

```
Traceback (most recent call last):
  File "/usr/bin/openshot-qt", line 6, in <module>

- Subject changed from Openshot: The 'openshot-qt==2.5.1' distribution was not found and is required by the application to [openshot]: The 'openshot-qt==2.5.1' distribution was not found and is required by the application

i get a different error, but its definitely broken - this may need to be pinned to qt5-base?

```

I think it might possibly have something to do with pyqt5, rather than qt5 itself.

anyhow it's just that it's still broken.
