did you run `pacman -Syu` first ?

most likely your keyring is outdated - you probably need the
latest keyring before installing that package

```
# pacman -Sy parabola-keyring
```

Excuse me, I forgot I had opened this issue.

I managed to get it working a couple of days ago. Updating the keyring didn't work at the time, I had to manually insert Andreas' keyring, then it worked.

Feel free to close the issue, thank you
