Category:	
Description	
When I do this command appeared this error: Error: Device 0 (vif) could not be connected. Hotplug scripts not working.	
My virtual machine configuration is: http://pastebin.com/b1rhCZHh	
My /etc/xen/xen-config.sxp : http://pastebin.com/uiHXSvWM	
I have add in the mkinitcpio these modules: i915 xen-blkfront xen-evtchn xen-netback xen-blkback	
I think that the error is produced by udev (the lastest udev can be incompatibile with the xen version) because I read this archlinux's forum: https://bbs.archlinux.org/viewtopic.php?id=111879
