

Packages - Freedom Issue #3142

Freedom Issue # 1167 (confirmed): [chromium][electron][qt5-webengine][qt6-webengine] QTWebgine/Electron embeds "entire Chromium platform"

[rz-cutter]: depends on 'qt5-webengine'

2021-12-08 12:02 AM - bill-auger

Status: fixed	% Done: 0%
Priority: freedom issue	
Assignee: bill-auger	
Category:	
Description	
it compiles and runs fine without webengine - unclear what feature(s) may be missing	

History

#1 - 2021-12-08 12:19 AM - bill-auger

- Assignee set to bill-auger

v2.0.3 is in [libre] now

i686 wont compile, neither arch32::staging (2.0.3), or arch32::community (2.0.2)

#2 - 2021-12-08 12:21 AM - bill-auger

- Status changed from in progress to fixed

#3 - 2022-09-22 02:09 AM - gap

Please split this report off into a new issue if this is not the right place for it.

AFAICT upstream deprecated Qt WebEngine integration so we might be able to send a bug report upstream to Arch asking them to remove the dependency so we can deprecate this package in the libre repo.

AFAICT upstream also deprecated Jupyter integration.

This package has jupyter in its dependencies (probably left over from an older version of the PKGBUILD), so it shows up as "virtual" on the repo website:

https://www.parabola.nu/packages/libre/x86_64/rz-cutter/

The PKGBUILD is missing checksums.

Whilst I'm here I may as well also mention it's out-of-date.

#4 - 2022-09-22 07:08 AM - bill-auger

- Status changed from fixed to forwarded upstream

you were right - it looks like the arch package did not actually use webengine, since four years ago - i opened a bug report about it - maybe they will adopt the changes, and rz-cutter can be restored

<https://bugs.archlinux.org/task/75972>

anyways, i updated the package in the process - it is actually ahead of arch now

#5 - 2023-09-07 02:33 AM - bill-auger

- Status changed from forwarded upstream to fixed

resolved upstream - ive removed rz-cutter from the blacklist
