<b>Description</b>			
<ul style="list-style-type: none"><li>• steps to reproduce:<ol style="list-style-type: none"><li>1. Install Gajim 1.3.3 using Pacman (pacman -Syu gajim)</li><li>2. Launch Gajim from the command line (gajim)</li></ol></li><li>• expected result:<p>Gajim should launch successfully.</p></li><li>• actual result:</li></ul>			
<pre>Traceback (most recent call last):   File "/usr/bin/gajim", line 33, in &lt;module&gt;     sys.exit(load_entry_point('gajim==1.3.3', 'gui_scripts', 'gajim')())   File "/usr/bin/gajim", line 22, in importlib_load_entry_point     for entry_point in distribution(dist_name).entry_points   File "/usr/lib/python3.10/importlib/metadata/__init__.py", line 919, in distribution     return Distribution.from_name(distribution_name)   File "/usr/lib/python3.10/importlib/metadata/__init__.py", line 518, in from_name     raise PackageNotFoundError(name) importlib.metadata.PackageNotFoundError: No package metadata was found for gajim</pre>			

## History

### #1 - 2021-12-14 05:19 AM - avalos

Actually, a lot of Python packages broke, not just Gajim. Now torbrowser-launcher outputs this:

```
Traceback (most recent call last):
  File "/usr/bin/torbrowser-launcher", line 29, in <module>
    import torbrowser_launcher
ModuleNotFoundError: No module named 'torbrowser_launcher'
```

### #2 - 2021-12-14 05:25 AM - avalos

This is the output of pip:

```
Traceback (most recent call last):
  File "/home/avalos/.local/bin/pip", line 5, in <module>
    from pip._internal.cli.main import main
  File "/usr/lib/python3.10/site-packages/pip/_internal/cli/main.py", line 10, in <module>
    from pip._internal.cli.autocompletion import autocomplete
  File "/usr/lib/python3.10/site-packages/pip/_internal/cli/autocompletion.py", line 9, in <module>
    from pip._internal.cli.main_parser import create_main_parser
  File "/usr/lib/python3.10/site-packages/pip/_internal/cli/main_parser.py", line 7, in <module>
    from pip._internal.cli import cmdoptions
  File "/usr/lib/python3.10/site-packages/pip/_internal/cli/cmdoptions.py", line 25, in <module>
    from pip._internal.cli.progressBars import BAR_TYPES
  File "/usr/lib/python3.10/site-packages/pip/_internal/cli/progressBars.py", line 8, in <module>
    from pip._vendor.progress.bar import Bar, FillingCirclesBar, IncrementalBar
ModuleNotFoundError: No module named 'pip._vendor.progress'
```

Which means, it is related with this issue: <https://bugs.archlinux.org/task/72990>

### #3 - 2022-05-07 08:21 PM - Zuss

Gajim launches fine on v1.3.3. I assume the python packages were resolved.

**#4 - 2022-05-14 11:28 AM - Zuss**

- *Status changed from unconfirmed to not-a-bug*

Closed as it launches fine on current versions
