#### History

##### #1 - 2021-12-30 08:04 PM - avalos

- File PKGBUILD added

Here's the PKGBUILD for version 41.3, based on Arch's one. The patch didn't require any change. It doesn't even require libportal anymore, it's unnecessary, it's only for Flatpak.

##### #2 - 2022-01-01 11:40 AM - MrXY

I can confirm it, I have the exact same problem.

My temporary workaround was to manually extract the older version of libportal, and put the missing file to /usr/lib/.

(Off: why does your spam filter contain about "too many non-dictionary words" in a technical forum where pathnames and package names are common?)

##### #3 - 2022-01-24 05:56 PM - bill-auger

- Assignee set to bill-auger

- Status changed from unconfirmed to in progress

##### #4 - 2022-01-24 05:59 PM - bill-auger

if the patch did not need to change; then why did it's checksum change?

##### #5 - 2022-01-24 06:34 PM - bill-auger

there is a problem compiling epiphany with meson 0.61.x

```
epiphany/data/meson.build:18:0: ERROR: Function does not take positional arguments.
```

it is possibly related to this freebsd patch:

<https://cgit.freebsd.org/ports/commit/?id=299348602e6d75b6f85b2e7303a0bea5f37541b6>

i did not apply that patch - i rebuilt x86\_64 with 0.60.3 - the standard i686 meson is 0.60.2

##### #6 - 2022-01-25 03:27 AM - bill-auger

- Status changed from in progress to fixed
