Description			
<p>Hi!</p> <p>I'm a novice here. A question: I usually use the i686 release of Trisquel GNU/Linux 9 Mini, but starting Trisquel 10, there will be no i686 release in the future. I would like to know, will Parabola GNU/Linux always have the 32 bit release for an old HP510 notebook of the year 2006-2007? Thanks for the attention!</p>
