- Parent task set to #3178
- Description updated

the file really is missing - this suggests a general class of problems, which could be addressed with better tooling (see [#3178](#))

Did we ever find out why this file is not at the repo? I still can't update.

#3 - 2022-02-15 03:23 AM - bill-auger

(see [#3178](#))

the workaround, for those who need this package immediately, is to install the package from arch manually - it is the identical package and signature which would be in the parabola repo now

```
# pacman -U https://archlinux.org/packages/community/x86_64/lua53-lgi/download
```
