

## Packages - Bug #3209

### wget on armv7h fails to verify certificates

2022-03-30 01:01 PM - GNUtoo

<b>Status:</b> confirmed	<b>% Done:</b> 0%
<b>Priority:</b> bug	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Description</b>	
On armv7h wget fails to verify the certificates:	
<pre>\$ wget https://parabola.nu --2022-03-30 14:56:30-- https://parabola.nu/ Loaded CA certificate '/etc/ssl/certs/ca-certificates.crt' Resolving parabola.nu (parabola.nu)... 93.95.226.249, 2001:470:1f09:96::2 Connecting to parabola.nu (parabola.nu) 93.95.226.249 :443... connected. The certificate has not yet been activated \$ echo \$? 5</pre>	
But curl works fine:	
<pre>\$ curl https://parabola.nu &lt;html&gt; &lt;head&gt;&lt;title&gt;301 Moved Permanently&lt;/title&gt;&lt;/head&gt; &lt;body&gt; &lt;center&gt;&lt;h1&gt;301 Moved Permanently&lt;/h1&gt;&lt;/center&gt; &lt;hr&gt;&lt;center&gt;nginx/1.16.1&lt;/center&gt; &lt;/body&gt; &lt;/html&gt;</pre>	
And wget also works fine on x86_64	
Bill Auger was also able to reproduce the bug.	

### History

it is curious that this does not affect curl - lucky that it does not; because pacman relies on curl by default
