

Packages - Bug #326

iceweasel-libre change addons repository

2013-05-07 03:23 PM - shackra

Status:	fixed	% Done:	0%
Priority:	feature		
Assignee:			
Category:			
<b>Description</b> Trisquel have a better repository of plugins than GNUZilla. Why not change the default repository for those from Trisquel?  Modify (or adapt) the following parameters in about:config like this:  <code>pfs.datasource.url = http://trisquel.info/sites/pfs.php?mime=%PLUGIN_MIMETYPE%</code> <code>pfs.filehint.url = http://trisquel.info/sites/pfs.php?mime=%PLUGIN_MIMETYPE%</code>  <code>extensions.webservice.discoverURL = https://trisquel.info/browser-plain</code> <code>extensions.getAddons.search.url = http://trisquel.info</code>  <code>browser.dictionaries.download.url = http://dictionaries.mozdev.org/</code> <code>browser.search.searchEnginesURL = http://mycroft.mozdev.org/</code>  I uploaded some screenshots to show the final result!

I agree!

#3 - 2013-05-20 03:57 PM - Anonymous

i put it on the last revision, but is not stable yet, example: if you install a addon from there it works fine, but when you want install another one, it doesn't works, i don't understand, but f you don't have this problem, please give to us a complete patch based like lukeshu made it one example => <https://projects.parabolagnulinux.org/abslibre.git/tree/libre/iceweasel-libre/replace-urls.txt>

- Status changed from open to fixed

icecat has directory.fsf.org addons by default since 24.0 version, so we put it on iceweasel-libre, icedove-libre and iceape-libre too. now it's solved!
