

Packages - Packaging Request #3266

[rttr] Adding to repo

2022-04-29 05:27 AM - Zuss

Status: wont-fix	% Done: 0%
Priority: bug	
Assignee:	
Category:	
Description The rttr library is required in order to compile and use Kdenlive. I've opened Kdenlive and a few of my projects, there doesn't seem to be any issues with running the program. While compiling it does throw out a warning for being unable to find doxygen. I'm not sure whether documentation generators should be included as an optdepend or makedepend. This is the first time I've made a package, let me know if there are any other issues with it. The library is licensed under MIT and the repo can be found at: https://github.com/rttrorg/rttr

- Status changed from open to wont-fix

the 'kdenlive' arch package no longer links to webengine; so it can be removed from the blacklist - 'rttr' will not be needed

thanks for the effort anyways - it was not in vain - it resulted in an important package being removed from the blacklist
