

Packages - Bug #3281

(!)ssl certificate for redirector.parabola.nu has expired

2022-05-14 12:52 AM - Drag0nFly

Status:	fixed	% Done:	100%
Priority:	bug		
Assignee:	lukeshu		
Category:			
Description			
The Letsencrypt SSL cert for the main redirector server has expired today (the 13th), preventing access from a majority of browsers. Also appears (at least according to some browsers) that HSTS is enabled.			
Reporting it as I can't see it mentioned when performing a search.			
<pre>:: Synchronizing package databases... nonprism.db failed to download error: failed retrieving file 'nonprism.db' from redirector.parabola.nu : SSL certificate problem: certificate has expired error: failed retrieving file 'nonprism.db' from redirector.parabola.nu : SSL certificate problem: certificate has expired error: failed retrieving file 'nonprism.db' from redirector.parabola.nu : SSL certificate problem: certificate has expired warning: too many errors from redirector.parabola.nu, skipping for the remainder of this transacti on error: failed to synchronize all databases (download library error)</pre>

- Status changed from unconfirmed to confirmed

Should be fixed now

#2 - 2022-05-14 01:19 AM - Drag0nFly

I notice the certificate has been renewed now, so the ticket can be closed.

#3 - 2022-05-14 01:20 AM - Drag0nFly

Yes, thanks. It appears our messages just crossed. :)

#4 - 2022-05-14 01:21 AM - lukeshu

- Status changed from confirmed to fixed
