

Packages - Bug #332

Asunder-libre missing from repositories

Description your-freedom automatically replaces asunder with asunder-libre, but I can't seem to find it in the package database. Was this removed on purpose, or is it a bug?	

History

your-freedom doesn't affect packages that would be replaced by their libre variants. There was no asunder-libre.

asunder was removed from blacklist because it's included on Debian [0] and Trisquel [1] without freedom issues.
