Description			
If I download its source code:			
<pre>\$ cd abslibre/libre/retroarch \$ makepkg -o</pre>			
Then it unpacks the source code in src/RetroArch/			
And in media/icons/LICENSE/, we have the license of media/icons which states that (in LICENSE.txt):

We have made these icons available for you to incorporate them into your products under the Creative Common Attribution 4.0 International License (CC-BY 4.0, https://creativecommons.org/licenses/by/4.0/). Feel free to remix and re-share these icons and documentation in your products. We'd love attribution in your app's *about* screen, but it's not required. The only thing we ask is that you not re-sell the icons themselves.
