Description rstudio: error while loading shared libraries: libboost_date_time.so.1.66.0: cannot open shared object file: No such file or directory	
Related issues: Related to Packages - Bug #2649: [rstudio-desktop]: error while loading share... confirmed	

History

#1 - 2022-11-29 07:09 AM - wael

- Status changed from unconfirmed to confirmed

It just needs a rebuild.

#2 - 2022-11-30 07:17 AM - bill-auger

- Subject changed from rstudio: error while loading shared libraries to [rstudio-desktop]: error while loading shared libraries

are you certain? - did you build the package? - if yes, you probably also solved [#2649](#), per which this package has been broken for years IIRC - presumably, this ticket could be the parent of the old ticket which is (presumably) blocking this one, or else could simply be closed as a duplicate of [#2649](#)

also note that the upstream version is frozen at the last version to support webkit; so only a rebuild is possible - this is a hack; and any such frozen packages potentially have an expiration - some day may arrive when they can no longer be supported by parabola - this hack has worked for this package for a few years already
