Do you have OpenRC system? Systemctl is one of the manage command of systemd init-system.

#2 - 2022-12-07 04:51 AM - maddox

I have OpenRC. Operating system shell recognize that systemctl does not apply, and if it does apply, it shall have it as dependency.

#3 - 2022-12-21 06:10 PM - bill-auger

- Parent task set to #3404

#4 - 2022-12-21 06:15 PM - bill-auger

- Status changed from unconfirmed to confirmed
