Now libcec is optional dependence https://www.parabola.nu/packages/extra/x86_64/plasma-remotecontrollers/

You can install it next command:

```
$ doas pacman -S --asdeps libcec
```

Also, "This package comes from Arch" (bug report not found) https://archlinux.org/packages/extra/x86_64/plasma-remotecontrollers/

The program does not completely work without libcec dependence?
