| Description Yggdrasil package is in Community repository and comes from Archlinux. For OpenRC system we need scrypt. I attach file init-scrypt from Gentoo. But I think, we should modify this in order easy to add rules in iptables: <ol style="list-style-type: none">1. Need to add in pacman hook command \$ useradd -m yggdrasil2. Need to add to /etc/init.d/yggdrasil, that start command on behalf of user:group yggdrasil:yggdrasil | |

History

#1 - 2023-01-25 01:04 AM - anonymous

- File *yggdrasil.txt* added

If do not specify the extension of the file, it will perceive it like .html. I attach it again with the expansion .txt. I checked this script, it works. Nothing needs to be added.

AUR contains PKGBUILD for yggdrasil-openrc, but I did not watch it.

#2 - 2023-03-13 03:14 PM - bill-auger

- Priority changed from *bug* to *feature*

the PKGBUILD on the AUR fetches an init script from the yggdrasil upstream - it probably makes most sense to use that one

#3 - 2023-03-13 03:14 PM - bill-auger

- File deleted (*Gentoo yggdrasil init-scrypt*)

#4 - 2023-03-13 07:31 PM - bill-auger

- Assignee set to *bill-auger*

- Status changed from *open* to *fixed*
